

Dräger HPS® 7000 Head Protection

The Dräger HPS® 7000 firefighter's helmet is in a class of its own, thanks to its innovative, sporty and dynamic design, ergonomic fit and components which make it a multifunctional system solution. It provides optimum protection during every operation.

Dräger HPS® 7000

Benefits

Tailor-made fit for every head

To meet this requirement, Dräger developed the HPS 7000 in close cooperation with customers worldwide. Two helmet shells for head sizes from 50 to 66 cm cover a wide range of individual head and face shapes. With a weight of approx. 1,380 g in the basic version, it is one of the lightest helmets in its class. In addition to its comfortable interior fitting made of skin-friendly, anti-allergic and flexible materials, the Dräger HPS 7000 stands out with its high level of operating and wearing comfort.

Comfort is a matter of position

The padded 4-point harness allows for safe and easy adjustment to any head shape. The optimum balance of the helmet can be adjusted individually in the neck and chin area. The padding made of Nomex® also ensures a comfortable fit. The integrated comfort hairnet enables the height to be adjusted and assures a good climate inside the helmet. During operation, the head size can be adjusted quickly via an easy-to-operate size-adjustment wheel with a safety mechanism on the outer shell, even with wet and thick gloves.

Nomex® is a registered trademark of the company DuPont.

Design at its strongest

The ergonomic helmet design evenly distributes the weight to the head and relieves the neck muscles. The large and modern facial protection visor offers unrestricted protection with best visibility. For operations under chemical protective suits, the visor can be fixed permanently. A safe alternative is provided by the integrated and individually adjustable protective goggles with an integrated soft-pad edge protection. Both visors leave enough space for the simultaneous use of corrective glasses or respiratory masks. A firefighter's helmet is more than a mere piece of equipment – it serves as a personal distinguishing feature. Therefore, you can configure the helmet according to your wishes: select from a variety of colours and also pick an individual emblem for your front plate.

Innovative system design

As a provider of integrated system solutions, Dräger sets new standards for the interaction of its products. The universally and individually adjustable mask connection system of the Dräger HPS 7000 creates a strong and safe helmet-mask combination. The full-face mask FPS 7000, the integrated mask communication units Dräger FPS-COM 5000 or FPS-COM 7000 and the SCBA of the PSS series allow you to optimally configure the overall system. The lightweight LED helmet lamp is integrated into the helmet shell and illuminates the whole working area. It is located in the centre of the front plate and has an effective glare shield as well as an intelligent battery management system. The interior fitting can be equipped with various audio/speech headsets for different radios. This ensures reliable communication even in loud environments.

Benefits

Highest safety – the material mix makes the difference

Despite its low weight, the Dräger HPS 7000 is one of the safest full-shell helmets in its class. Its outer shell of composite material in combination with the PUR inner shell provides reliable protection against thermal and mechanical influences. The plastic reinforced with fibreglass and aramid webbing resists extreme temperatures. It is even able to withstand the enormous radiation caused by the heat and flame engulfment of a flash over. The visors, made of high-temperature-resistant polyether sulphone, reliably protect your eyes and face against high heat, particles and liquid chemicals.

Nothing left to be desired

A comprehensive accessory programme completes the Dräger package. Reflective stripes improve your visibility under unfavourable conditions and allow for individual marking. Matched to your clothing, the various neck-protection versions reliably keep your back free. Separate helmet lamps are attached with a lamp adapter on the right or left helmet side. A Nomex® fabric protects your helmet in any training situation and extends its service life. Helmet bags and cases provide safe storage and transport.

Ready again in no time at all

The Dräger HPS 7000 is easy and efficient to service, thanks to the minimum number of components. The entire interior fitting can be removed and reinstalled in just a few steps. You can replace individual components easily and quickly using standard tools. All helmet components are cleaned and disinfected manually or in an industrial washing machine.

Outstanding design

The firefighter's helmet Dräger HPS 7000 has been awarded three major design awards:

- Red dot design award 2013
- IF product design award 2014
- German Design Award Special Mention 2015

The awards count among the most important national and international design competitions and not only rate design quality, but also aspects such as safety, ergonomics, functionality, degree of innovation and environmental compatibility.

The red dot jury based its decision on: "The notably light Dräger HPS 7000 firefighter helmet can be customised to comfortably fit any head size and guarantees enhanced safety."

Awards

System Components

D-13066-2010

Dräger FPS® 7000

The Dräger FPS® 7000 full-face mask series sets new standards in terms of safety and wearing comfort. Thanks to its enhanced ergonomics and the availability of multiple sizes, it offers a large, optimized field of vision and a very comfortable, secure fit.

D-28795-2015

Dräger FPS®-COM 5000

Because there is no time for misunderstandings in an emergency: The Dräger FPS®-COM 5000 communication unit has been specifically developed for the full-face mask Dräger FPS® 7000 and ensures clear communication through a voice amplifier unit or radio device – even under extreme conditions.

Accessories

D-56197-2012

Facial Protection Visor PESU for Dräger HPS® 7000

The integrated, large and ergonomic facial protection visor made of high-temperature-resistant polyethersulfone protects you safely from extreme heat, particles and liquid chemicals. It also offers the best visibility. It is made to fit a wide range of individual face sizes and shapes, including the wearing of corrective spectacles. The visor is available in different versions: clear, clear/anti-scratch coating, gold-plated (protection against heat radiation) or anti-fog coating.

D-56198-2012

Protective goggles for Dräger HPS® 7000

The protective goggles are operated from the outside by two levers (suitable for both left- and right-handed use) and have a 2-position setting for adjustment to individual face sizes and shapes including the use of corrective spectacles. The integrated soft-pad edge protection ensures a comfortable fit. The protective goggles are available in different versions: clear (PESU), clear/anti-scratch coating (PESU) and tinted (as a glare protection, PC) exclusively for the Dräger HPS® 7000 PRO.

D-4687/0-2015

Neck protection for Dräger HPS® 7000

The various neck protection versions can be quickly and securely mounted via a plug-in system with four snap fasteners. These are available as optional accessories in 3 designs:

- short, close-fitting Nomex version with integrated fold
- Alu-Nomex® longer version, with robust aluminium coating
- Holland cloth version made of a 3-layer, high-quality Nomex®/aramid fabric, resistant to many acids and alkalis

D-56209-2012

Helmet lamp LED for Dräger HPS® 7000

The light-weight LED helmet lamp is integrated into the helmet shell and illuminates the whole working area. It is located in the centre of the front plate and has an effective glare shield. The 3W high-performance LED has three modes and two lighting levels (bright, dimmed, off). A function and battery test is integrated and the battery status is displayed during use.

Accessories

D-1131-2010

Lamp Dräger PX1 LED

High-performance lamp with new LED technology. The lamp can be attached on the left and/or the right side of the helmet.

Related Products

D-28816-2015

Dräger HPS® 3500

The Dräger HPS® 3500 – a multifunctional and universal helmet for the diverse requirements of rescue teams during search and rescue, forest and bush fire fighting, traffic accidents, rescue from heights, water rescue and any kind of technical assistance.

D-37163-2015

Dräger HPS® 4500

The Dräger HPS® 4500 is a traditional half-shell helmet with a modern design. Its robust outer shell provides you with excellent protection against impact and extreme heat. With a modern visor design, the helmet has superior wearer comfort due to ergonomic and lightweight internal components. A comprehensive range of accessories make our solution a truly versatile helmet across a variety of applications.
